Consultation on Design Protection in the EU

Fields marked with * are mandatory.

Introduction

The main substantive aspects of national laws on the protection of designs are harmonized at EU level by the Design Directive[1] from 1998, which also aimed at maintaining a system for registering designs for businesses that only operate within an EU Member State. Alongside those national protection systems, the Community Design Regulation[2] from 2002 created an autonomous system for the protection of Community designs having equal effect throughout the European Union.

Designs are defined as appearance of the whole or a part of a product resulting from its features such as e.g. lines, contours, colours, shape, texture, materials used or ornamentation. Designs can be part of handcrafted or industrial goods, including among others also packaging, graphic symbols or even fonts.

Designers can benefit from different forms of protection of their work in the EU. Their creations are protected without any registration or formalities for a period of three years as unregistered Community designs (governed by the Community Design Regulation) if they are made publicly available ('disclosed') within the EU. When longer protection of up to 25 years is wanted, designers have a choice of registering their designs separately in some or all of the EU Member States following the harmonized national rules (as specified by the Design Directive).

Alternatively, they can register them once for the whole EU using the registered Community design (governed as well by the Community Design Regulation) managed by the European Union Intellectual Property Office (EUIPO). As yet another option, designers can protect their creations within or outside the EU through the Hague System for the International Registration of Industrial Designs, administered by the World Intellectual Property Organization (WIPO). While procedures are not harmonized, the principal substantive conditions for registering a design are identical in all EU Member States as are the principal rights of design owners. Design is a property right and its owner decides who can use it, how and for what price. Protection covers unauthorized use or copying. In 2017, 94,000 registered Community designs were registered (6% more than in 2016, and 12% more than in 2015). The registration involves fees, which for the registered Community design amount to €350 including publication.

This public consultation aims at gathering views of all those affected by design protection in Europe in order to evaluate the performance of the Community and national systems and identify areas where changes may be necessary. The consultation builds on and follows previous research, analysis and targeted surveys carried out as part of two studies on economic (http://ec.europa.eu/growth/content/economic-review-industrial-design-europe-0_en) (2015) and legal (https://ec.europa.eu/growth/content/legal-review-industrial-design-protection-europe-0_en) (2016) review of the design protection systems in Europe.

The questionnaire of the consultation is divided into several different sections. In principle respondents can choose to reply to a selection of these sections (one, several or all) according to their profile/type of activity. However, different levels of knowledge and experience will be needed to be able to answer the individual questions. While the reply to general questions will require at least certain knowledge on design protection in the European Union, it will not be possible to answer a larger number of specific questions without having profound legal expertise and experience in the relevant field.

General questions to all

***1. Please indicate whether your knowledge of the design protection systems in the EU comes from the fact that you or members of your organization**

at least 1 choice(s)

- Create/own designs
- Use designs of others
- Give (legal) advice
- Work in intellectual property office, ministry, court or other authority
- Lecture/research the topic
- Other
- I don't have any knowledge of the design protection systems

***2. What do you generally think about the overall functioning of the design protection system in the EU (taking national design systems and the Community design regime altogether as a complementary whole and considering all relevant aspects of design protection)?**

- It works very well
- It works rather well
- It works rather bad
- It works very bad
- No opinion

Specific question to national authorities

*5. Do you agree that the respective costs involved in implementing the Design Directive and the Community Design Regulation are justified given the benefits that have already been achieved by harmonizing essential aspects of design protection and providing for a unitary system of EU-wide protection?

- Yes
- No
- No opinion

General questions to all

*6. In this context, to what extent do you agree that the harmonization of national rules and the creation of the Community design system is of added value compared to a situation where Member States would have (entirely) different rules on design protection and such protection would be available at national level only?

- Strongly agree
- Agree
- Disagree
- Strongly disagree

***7. Are you aware of any unintended consequences or shortcomings of the Design Directive or the Community Design Regulation?**

- Yes
- No
- No opinion

***8. In general, do you think that there is sufficient awareness among designers and entrepreneurs (including small and medium-sized enterprises) of the availability, benefits and ways for protecting designs in the EU?**

- Yes
- No
- No opinion

***If no, please specify where and in what respect you see deficiencies in the awareness:**

5000 character(s) maximum

***9. Do you consider that the unregistered Community design provides a useful legal protection against unauthorized copying of that design by a third party?**

- Yes
- No
- No opinion

***Please explain your answer:**

More specific questions to all

We would now like to ask you questions that are more specific. These are best answered by those with greater knowledge or experience with the design protection systems in the EU.

Terms of protection

***14. An unregistered Community design is protected for 3 years after its first making available to the public. Do you think this term of protection is adequate?**

- Yes
- No, it is too long
- No, it is too short
- I have no opinion

***15. A registered Community or national design can be protected up to 25 years from the date of filing. Do you think this term of protection is adequate?**

- Yes
- No, it is too long
- No, it is too short
- I have no opinion

Spare parts protection

At the time of adoption of the Design Directive it was not possible to harmonize design protection for spare parts. The latter concern visible component parts used for the purpose of the repair of a complex product (such as a motorcar) so as to restore its original appearance (covering, in particular, body panels, integrated lighting and automotive glass).

While the majority of Member States extend design protection to such spare parts the other part does not do so.

***16. Are different rules on spare parts protection in the Member States a problem for you?**

- Yes
- No
- No opinion

*Please explain your answer:

5000 character(s) maximum

n.a.

***17. Should the rules on spare parts protection be the same in the EU?**

- Yes
- No
- No opinion

***If yes, please explain your answer and tell us what should be the common rules:**

5000 character(s) maximum

full harmonization is desirable

Specific questions to lawyers/legal advisors, authorities and academia

The following questions are very specific and therefore require profound legal expertise and experience in order to be answered.

Subject-matter and scope of protection

39. Based on your knowledge of the design protection systems in the EU, please evaluate the following elements in the legislation and its application by industrial property offices and in courts.

between 3 and 3 answered rows

	Very clear	Clear	Not clear	Very unclear	No opinion
*The definition of a "design", a "product" and a "complex product"	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
*The requirements for protection (e.g. related to the need of being "visible")	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
*The scope of design protection (e.g. as to how to determine the individual character of a design)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>

Rights conferred

***40. Do you consider that the current scope of design rights, including limitations, provides sufficient protection against third parties copying a protected design by means of 3D printing?**

- Yes
- No
- No opinion

***41. Do you think that the scope of design rights should allow preventing third parties from transiting counterfeit design goods through the Union territory even if the goods are not intended to be placed on the Union market?**

- Yes
 No
 No opinion

***Please explain your answer:**

5000 character(s) maximum

Grounds for invalidity

***42. Do you think that lack of clarity and consistency in the representation should be an explicit ground for invalidity of a design?**

- Yes
 No
 No opinion

***Please explain your answer:**

Procedural issues

*** 43. In your view, are the current requirements for the representation of Community designs under the Community Design Regulation and the respective Implementing Regulation (EC) No 2245/2002 (e.g. means of representation and their combination, static views, maximum number of views, neutral background) appropriate to show designs with sufficient clarity and precision, both for tangible products and non-tangible products (e.g. animated designs, graphical user interfaces)?**

- Yes
 No
 No opinion

***Please explain your answer:**

5000 character(s) maximum

the possibility to file computer animated designs appears very useful and technical cooperation in this respect would be welcomed

***44. Are you aware of any problems in relation to the option to file a description of a design under the Community design regime, national law or the international Hague system?**

- Yes
 No
 No opinion

***45. The Community Design Regulation allows for the filing of a specimen where the application is for a two-dimensional design (e.g. a piece of textile), and deferment of publication is requested. Do you consider this option still to be relevant and meeting current business needs?**

- Yes
 No
 No opinion

***Please explain your answer:**

2000 character(s) maximum

none were filed at BOIP, and besides, the scope of protection is determined by what's in the register

*46. In your view, are there any specific provisions or requirements/conditions in the Community Design Regulation or the respective Implementing Regulation (EC) No 2245/2002 in relation to procedures before the EUIPO (e.g. for the application or registration of a registered Community design) which you consider to be inappropriately complex or rigid, or generating unnecessary burdens for users of the system?

- Yes
 No
 No opinion

Other potential for improvement

*47. Are you aware of any (other) specific issue in relation to the protection, registration or enforcement of designs in respect of which you feel there is need for improvement or updating of the Community Design Regulation and/or the Design Directive?

- Yes
 No
 No opinion

Degree of harmonization

48. Below is a list of design law aspects that are not (fully) harmonized by the Design Directive. For each item please let us know how do you assess the need for harmonization in view of potential obstacles for the internal market and the establishment of a level playing field for the registration of national designs.

Specific question to national authorities

*49. In some Member States, invalidity proceedings can only be brought before a judicial body. What is your view on making such proceedings available before all national industrial property offices across the EU?

- Positive
 Negative
 No opinion

*Please explain your answer:

2000 character(s) maximum

too little experience with designs at national/regional office, due to low volumes compared to EUIPO

Specific questions to lawyers/legal advisors, authorities and academia

*50. In terms of coherence, are you aware of any problematic inconsistencies or discrepancies in the provisions of the Design Directive and/or the Community Design Regulation, and/or between these two instruments, and/or between one/both of these two instruments with other Union legislation?

- Yes
 No

*51. The Community Design Regulation and the respective Implementing Regulation (EC) No 2245/2002 set out rules for procedures before the EUIPO which is also responsible to conduct procedures in European Union trade mark matters. Are you aware of any procedural discrepancies between these regulations which are not justified by the different nature of designs and trade marks?

- Yes
 No
 No opinion

*52. In your opinion, to what extent has the accession of the EU (2006) to the international Hague system, which allows EU applicants to obtain design protection in countries which are party to its Geneva Act, proved to be a useful complement to the available venues for obtaining design protection both within and outside the EU?
