Annex XIV - Table 1a: Greenhouse gas projections by gases and categories<sup>1)</sup>  
Version 12 July 2023  
Instructions (click the 'x' at the left)

Table with columns for gas categories (A-F), years (2021-2030), and values. The table is divided into sections for different gases: CO2, CH4, N2O, HFC, PFC, and SF6. Each section contains a list of categories with corresponding data points for each year. Some cells are highlighted in yellow or green.

Notes:  
1) Includes a legend for the table and instructions on how to use the data, including details about the units and the source of the data.
